

#### SASM Readme.txt

Before running SASM, be sure that the MPLAB directory is in the command path.

#### Win 9X

You should see the MPLAB directory in the PATH assignment in your AUTOEXEC.BAT file.

EX: PATH = c:\windows;c:\windows\command;c:\progra~1\mplab

#### Win XP

Right click on My Computer. Click the Advanced tab and select the Environment Variables button.

Under User Variables, the PATH variable should contain the MPLAB directory.
